

## Stressing Of CWR Level Three

### COURSE AIMS

This course is designed to expand the knowledge and skills of existing holders of Level 2 Competency Certification, to enable delegates to undertake the Stressing of all types of suitable S & C.

### LEARNING OBJECTIVES

At the end of this course the delegates will: -

- Be able to undertake a preliminary Site Survey
- Have a clear understanding of pulling Parameter Limitations
- Have clear understanding of the correct siting of Adjustment Switches
- Be able to demonstrate underpinning knowledge of the General Stressing Procedure relating to S&C
- Have a comprehensive understanding of the Components and their replacement within S & C
- Be able to determine the Causes and Rectification Method for Stressing faults within S & C

### COURSE DURATION

Two days, inclusive of written assessment.

### PRE-REQUISITES

Delegates attending this course must be holders of a valid Level 1 and 2 Certificate of Competence and have a comprehensive knowledge of S & C Construction.

### PERSONAL PROTECTIVE EQUIPMENT

Personal Protective Equipment is not required on this course.

### CERTIFICATION

A Certificate of Technical Competency Level 3 will be awarded upon successful completion of an underpinning knowledge assessment.
